7834 Forest Hill Avenue  
Richmond, VA 23225

Dear Dr. Pollock:

This letter is official notification by the State Board of Medicine of the decision of the informal conference committee which met with you on October 26, 1984, at the Arlington Hospital in Arlington, Virginia.

The committee was of the opinion that the allegations of improper diagnosis based upon inadequate or controversial or faculty reasoning and judgement was substantially correct but mitigated by no malicious or purposeful intent to deceive or defraud the public.

It is the recommendation of the committee, however, that you immediately cease and desist from the use of controversial chiropractic methods not generally accepted by your peers and also be admonished from over-diagnosing.

Please indicate to this office that you will comply with the findings of the informal conference committee.

Sincerely,

  
George J. Carroll, M.D.  
Secretary-Treasurer
